INTRODUCTIONS

After introductions it was determined that the minutes from the last meeting were not sent out. They will be sent out with the current meeting minutes.

PARKERSVILL DAM TOUR

Committee members boarded buses and traveled to the Parkersville Dam. The dam operator and Marion County Public Works personnel provided a briefing on the workings of the dam, potential problems and potential solutions.

PUBLIC WORKS UPDATE

Rob Kissler provided information from the Army Corps of Engineers on the status of the Keizer dike.

YEAR 2000 PROBLEM

Les Martin provided a briefing on the potential problems we face at the turn of the century. Basically many computers, software and computer chips were

constructed without thought of the year 2000. When the dates change to 2000, the various computer components may be rendered inoperative because they cannot define this change in years. There may not be much we can do to prevent potential problems, but we should be prepared for any problems that may arise, such as lack of basic essential services for our community. Further discussion will be conducted at the next meeting.
