 - Undercoating

"W" SERIES PANELS...

High Security Design... Sides, roof and ends are constructed with 16 or 20 gauge steel. Mobile Mini "W" Series seam or skip welded panels. All steel frame for superior strength and security.

VENTING (optional)...

The four intake vents located at the bottom four corners allow air into container; the air mixes inside container and escapes through the two top outtake vents on each side of container creating vertical convection ventilation.

FORKLIFT POCKETS (optional)...

Forklift pockets are a must if container is to be moved regularly with a forklift. The forklift pockets help prevent damage to the bottom of the container and make relocating much easier.

DUAL SWINGOUT DOORS...

Side or end mounted high security swingout doors offer exceptional security, weather tight gaskets, 270° door opening, 3-way cam locking system and at the same time ease of opening.

TRI-CAM LOCKING SYSTEM...

Our exclusive lock features three interior compression locking mechanisms on active door and two compression locking mechanisms on inactive door for maximum security. Use a circular discus lock or a standard padlock.
